

Lyon's Creek East

Tuesday, November 25, 2008

COMMENT SHEET

The Remedial Action Plan Technical Advisory Group is recommending that a Monitored Natural Recovery option be implemented to manage the sediments in the creek. Part of the implementation includes an outreach program to the community. We are seeking your assistance to ensure that we have the information that we need to develop an effective outreach program. Please take the time to complete this comment sheet. Feel free to take additional copies with you to share with your neighbours and other people in the community.

Creek Activities

1. The Technical Advisory Group carried out a survey in 2005 to determine the activities associated with the creek. The survey was completed by 167 people in the area. If you did not have an opportunity to respond to that survey please indicate the activities that you or your family engages in near or in the creek.

Other Information

2. What other information do you think the Technical Advisory Group needs to know as we develop the management and monitoring plan for the sediments?

3. How do you want to continue to be kept informed of this project?
